Configuration Guide

LDAP Configuration

LDAP Contextless Login Root
Enter the top level LDAP context of your LDAP directory. This sets the top level LDAP container where an LDAP sub-tree search is performed to find your user entries. If you need to enter multiple containers, you can use the configuration editor to add them after this guide completes.
LDAP Contextless Login Root
» dc=trifork,dc=com

Administrator Search Filter
Enter the LDAP search filter to use for determining if a user should be given administrator access to this system. Any user that authenticates and matches this filter will be allowed administrative access. The example below uses group membership but any valid LDAP search filter can be used.
Administrator Search Filter
» cn=admin

LDAP	GOOD	All configured LDAP servers are reachable
Admin Users	GOOD	Users matching current Administration Search Filter: <ul style="list-style-type: none">• cn=admin,dc=trifork,dc=com
